DETAILED ACTION

Allowable Subject Matter

1. Claims 1-26 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the device of claim 1, in particular the limitation that TFTs for driving the green and blue pixel electrodes are formed in the blue pixel regions. Claim 1 is therefore allowed, as are its dependent claims 2-7.

Similarly, the prior art does not disclose the device of claim 8, in particular the limitation that TFTs for driving first-color and second-color pixel electrodes are formed in the second-color pixel regions. Claim 8 is therefore allowed, as are its dependent claims 10, 12, and 22.

Similarly, the prior art does not disclose the device of claim 13, in particular the limitation that there are TFTs for driving the blue and green pixel electrodes, all of which are formed in the blue pixel regions. Claim 13 is therefore allowed, as are its dependent claims 14 and 15.

Similarly, the prior art does not disclose the device of claim 16, in particular the limitation that the first and second switching devices (for driving the first and second pixel regions, respectively) are provided in the first pixel region. Claim 16 is therefore allowed, as are its dependent claims 17-21.

Similarly, the prior art does not disclose the device of claim 23, in particular the limitations that each pixel region has a single pixel electrode, and one of the pixel

regions includes two TFTs for driving two pixel electrodes, respectively. Claim 23 is therefore allowed, as are its dependent claims 9 and 24-26.

The prior art does not disclose the device of claim 11, in particular the limitation that a width of the gate lines adjacent to the blue pixel regions is greater than that of the gate lines adjacent to the other pixel regions. Claim 11 is therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,760,081 to *Takagi* discloses a device in which the width of the gate lines adjacent to the pixel regions varies, but not in such a way that it is greater adjacent the blue pixel regions than adjacent the other pixel regions.
